

# INTRODUCTION

*Chemical species present in the environment are either naturally occurring or generated by human activities.*

*Environmental pollution is the effect of undesirable changes in the surrounding that have harmful effects on plants, animals and human beings.*

*Troposphere is the lowest region of the atmosphere (~10 km) in which man along with other organisms including plants exist.*

*Whereas stratosphere extends above troposphere up to 50 km above sea level. Ozone layer is one of the important constituents of stratosphere. Tropospheric pollution is basically due to various oxides of sulphur, nitrogen, carbon, halogens and also due to particulate pollutants.*
